(54) THERAPEUTIC AGENT FOR RETINOCHOROIDAL DISEASE CONTAINING STEROID AS ACTIVE INGREDIENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a therapeutic agent for retinochoroidal diseases containing a steroid having excellent effect than a conventional steroid as the active ingredient and a dosage form for treating retina and choroid diseases whereby steroid can be conveniently administered.

SOLUTION: This invention provides a subconjunctival injection containing, as an active ingredient, a therapeutic agent for retina and choroid diseases containing betamethasone and hydrocortisone as the active ingredients. The invention also provides a subconjunctival injection containing a steroid as an active ingredient. The retinochoroidal diseases include age-related macular degeneration, diabetic retinopathy or proliferative vitreoretinopathy.
